Homework 4

Due: Thursday 1/31 at 11:59pm

Complete the following problems on www.codingbat.com. You don’t need to “re-share” your account so there isn’t anything to turn in. As before, you’ll hear from me only if you are missing problems. If you start, but don’t complete some problems, you can email me your code for partial credit. (You can also email me looking for advice.)

1. (4 points) String-1.middleTwo
2. (4 points) String-1.atFirst
3. (4 points) String-1.minCat
4. (4 points) String-2.xyzMiddle (You may want to deal with even-length and odd-length strings separately. You can determine which type you have by looking at str.length() % 2.)
